

Part number	Telstra S/I	Description
CG-1000	77/113	Coax Demarcation Enclosure

CG-1000 Coax Demarcation Enclosure

The CG-1000 Coax Demarcation Enclosure provides a secure compartment for terminating coax, and mounting any combination of splitters and/or ground blocks. Constructed of a weather-resistant/high impact thermoplastic alloy, the hinged cover design allows easy access while the self-sealing individual entrance ports prevent water and insects from entering. The organized mounting arrangements not only create a standardized method for high quality drop installations, but also allow future expandability for broadband equipment.

Features:

- Weather-resistant/high impact thermoplastic alloy
- Self-latching, hinged cover design allows easy access without loose parts
- Organized internal mounting bosses create a standardized mounting arrangement and allow for proper bend radius of coax cable up to RG-6
- Upgradeable/separate secure subscriber compartment
- Upgradeable telephony demarcation
- Self-sealing individual entrance ports prevent water and insects from entering

Application:

Residential Coaxial Drop Installation

Further Information:

The CG-1000 is intended to be mounted outdoors on the side of the customer's house. Its weatherproof design protects the inside components against rain and directed water spray. The thermoplastic housing and wire entrance grommet materials used in the enclosure are fire retardant, UV stabilized and resists degradation from environmental contaminants, chemical fertilizers and insecticide sprays. The housing can be painted with latex or oil base paints.

The CG-1000 cover features a snap latch and can provide various types of security including f81 terminators and recessed hex fasteners. A hasp opening is provided for attaching a tamper-evident security seal, including a padlock.
